

THE BLAIRMORE ENTERPRISE

VOL. XXVI. NO. 19.

THE BLAIRMORE ENTERPRISE THURSDAY, MAY 9, 1935.

\$2.00 PER ANNUM

GRAND CELEBRATION AT BELLEVUE, MAY 24th

A grand Victoria Day celebration is planned for Bellevue for May 24th. A full line of sports is scheduled to include races, softball, tug-o'-war, horseshoe pitching and five-a-side football.

Special attractions in open air platform activities will consist of choir singing by the juniors, folk dances, and the old time maypole dancing by the school children.

One of the chief centers of attraction will be the choosing of a May Queen selected by popular ballot from the sale of the admission tickets to the grounds. Every ticket sold carries a value of 10 cents which the purchaser may give to any one of the six girls nominated by the high school. The ballot will be placed in the ballot box located in the store window of Johnson & Cousins, which will be opened at stated intervals and the standing recorded by the chairman of the ballot committee, Mr. J. A. McLean. The final opening of the ballot box will be at 8 p.m. on May the 22nd.

The nominations for May Queen are as follows: Irene Wells, Esther Chiaravano, Ellen Boyle, Flora Boutry, Ivy Harvey and Elsie Whaley.

A grand concert will be held in the United church auditorium at 8 o'clock.

The proceeds will be in aid of the debt fund of the United church at Bellevue.

SOCIAL CREDIT FOR ALL OF CANADA

Ottawa, May 7—Major C. H. Douglass, here for a few days, enroute to Edmonton, said today he was quite confident that effective action towards an ultimately successful conclusion of a social credit plan for all Canada can be initiated in Alberta.

Answering a question, if he believed a single province had authority under the Canadian constitution to inaugurate as a sovereign credit power social credit within its borders, he replied: "It is a matter of strategy."

CORBIN MINES WILL CLOSE

Official announcement was made at Victoria on Tuesday that the mines of the Corbin Collieries at Corbin, where a strike has been conducted for some time, will close. Efforts to arbitrate failed. As a result, three hundred men will be out of employment.

The company's investment is stated to be approximately \$4,000,000. The mines have been in operation 27 years.

Trouble developed on April 17th, when strikers and police clashed, with injuries to about two score persons.

Notices were posted in Corbin on Tuesday that, effective immediately, operations of the Corbin Collieries Ltd., will be suspended indefinitely. The resignation of all officials is requested, by order of the board of directors.

CONCERT AT HILLCREST

A splendid concert programme was staged at Hillcrest on Thursday night of last week, in which artists from Coleman and Blairmore took part.

The chair was occupied by Rev. John Wood, and the programme was in part as follows:

"Canada."

"Soldier's Chorus"—the Blairmore Male Voice Choir, T. S. Beynon, conductor.

Accordion solo—Mr. S. Tono. Tenor solo—Mr. Percy Rhys. "Dear Land of Home" and "Cotton Dolly"—the choir.

Piano solo—Betty Ironmonger. Baritone solo—Alfred Phillips. Vocal solo—Ismay Hadley.

"Comes in Arms"—the choir. "Minstrel Boy" and "Marching" the choir.

Baritone solo—Howell Powell. Song—Ismay Hadley. "Sailor's Chorus" and "Farmer's Boy"—the choir.

Accordion solo—Mr. Trono. Baritone solo—Alfred Phillips. "Jolly Rogers"—the choir. "God Save The King."

BLAIRMORE FITTINGLY OBSERVES THE JUBILEE

Although the weather man acted anything but kindly towards Blairmore on Monday morning last, the programme as arranged was to a large extent carried out successfully.

At 10 a.m. a great concourse of men, women and children had gathered at the central school grounds, to witness the "Breaking of the Flag," and following the singing of the National Anthem, the procession took

form, headed by the Royal Canadian Mounted Police and a massed band of forty pieces.

The procession took the following order: R.C.M.P., tug, school children, Boy Scouts, Cubs, Girl Guides, Brownies, L.O.D.E., Veterans, Citizens, etc., (630 persons on foot) followed by fifty-three loaded and decorated cars and eight decorated bicycles. The procession headed

west on Street Street, south via Sixth Avenue to Victoria Street, east to Twelfth Avenue, north to State Street and west to the United church, where a stirring patriotic address was delivered by Mr. F. O. McKenna, of Pincher Creek.

The parade was one of the largest and best conducted ever witnessed in Blairmore. At the church, all children were handed jubilee buttons and ice cream cones.

Roland Pinkney was awarded the prize for the best decorated car in the parade, Beecher Wilson for the best decorated bicycle, and little Violet Kemp was awarded the prize for having the best dressed pet—a dog.

Mr. Pinkney very generously donated his prize to the Jubilee Cancer Fund.

The success of the morning functions was in no small measure due to the splendid work of W. H. Chappell and his parade committee, Principal MacPherson and school teachers, A. E. Ferguson, of the finance committee, and E. A. Harper, who as chairman of the clearing committee worked strenuously for the event.

Early in the afternoon, a large number proceeded to Coleman to take part in the functions there, where it was estimated fully one thousand persons paraded.

At night, a grand Jubilee ball was held in the Columbus hall, under auspices of the I.O.D.E. The affair was very largely attended and most enjoyable.

A feature of the day was the great bonfire on Turtle Mountain, lighted by the Boy Scouts about 9:30 o'clock part of the coast to coast jubilee beacons.

The following from this district were among the successful competitors at the East Kootenay musical festival at Cranbrook: Lorraine Pirlo, Frank, first in piano solo under 18; Patsey Collins, Pincher Creek, first in violin solo under 11; Doreen Chappell, Blairmore, first in violin solo under 16; Rudolf D'Amico, Coleman, first in violin under 17 (Fink Cup); Urie Johnson, first, and Margaret Murray, second, in piano solo under 19; Ross Oliver, Blairmore, first in piano solo under 17; Frank Mozark, Bellevue, first, and Paraska Gushul, Blairmore, second, in violin solo under 15; Catharine Rose, Hillcrest, first, and Evan Gushul, Blairmore, second, in violin solo open; Jean Cruckshank, Hillcrest, winner of instrumental championship (East Kootenay Musical Festival Cup); Doreen Chappell, George Kerr and W. H. Moser, first in instrumental trio; Hillcrest String Quartette, first in string quartette open; Crows' Nest Pass String Orchestra, first in open string orchestra; Crows' Nest Pass Amateur Symphony Orchestra, first in open symphony orchestra (Key City Lodge Shield); Blairmore Male Voice Choir, first in male chorus (George Anton Shield); Isabel Westrup, Hillcrest, first in senior piano sight reading. The above may not be a complete list.

WORLD HAPPENINGS BRIEFLY TOLD

Immediate construction of 500 new aeroplanes for military purposes will be undertaken by Great Britain, it has been authoritatively learned.

Miss Amy Molaison, premier woman flyer, cracked up her new plane, the first time she flew it at Croydon airrome. She escaped with a severe shaking-up.

Pilot Rosterguyeff and Student Pilot Balburt remained in the air in a glider for 24 hours, 25 minutes at Kotkabell, Crimea, and claimed a world's record.

Five men and a boy were seriously injured when a bomb was thrown in a crowd witnessing an Indian wedding procession at Calcutta. No arrests were made.

Women of the village of Broderick, Sask., "which has had no crop for several years," held a silver collection box and netted \$19.25 to swell the King George V. silver jubilee cash fund.

Notification that 10,000 tons of steel rails had been ordered from the Syden plant of the Dominion Steel and Coal Corporation by the South African government was received recently.

Sir Malcolm Campbell, who can go about as fast as he wishes at Daytona Beach, Fla., was fined \$1 in police court for exceeding England's recently instituted 30-miles-an-hour speed limit in bullet car.

Stamp issued for the diamond jubilee of Queen Victoria in 1897 are still in circulation. Prince Albert post office authorities report a letter with the 35-year-old stamp passed through the mails, mailed from someone in the district.

Workers Donate Planes

Nine Have Been Added To China's National Air Force

Nine new airplanes, eight of which were donated by employees of government-owned railways in China, and one of the Overseas Chinese in Java, have been officially added to China's national air force. The eight railway planes cost \$330,000 and the one from Java \$130,000. More than 1,000 government officials and National Party leaders and over 10,000 spectators were present at the Old Ming Palace Aerodrome in Nanking when Wang Ching-wei, president of the Executive Yuan, accepted the planes from China. He spoke of the importance of the development of aviation as a step toward national consolidation in China. After the planes had been christened and the National and Party flags removed from the machines Chinese aviators gave a formation and stunt flying exhibition.

Swimming Pool For Blind

An open air swimming bath, the first of its kind for the blind is in the process of construction at the Tegel lake, near Berlin, Germany, where railings are being erected in the water to safeguard bathers from swimming out too far. It will be opened in May. The example of Berlin will be followed by other German towns.

She: "No one understands me." He: "No wonder; your mother was a telephone operator and your father was a train announcer."

QUIVERING NERVES

When you are just an edge . . . when you can't stand the children's noise . . . when everything you do is a burden . . . when you are irritable and blue . . . try Lydia E. Pinkham's Vegetable Compound. 98 ozs. of 100% vegetable benefit.

It will give you just the extra energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

VEGETABLE COMPOUND**

Little Journeys In Science

COBALT AND NICKEL

(By Gordon H. Guest, M.A.) Cobalt and nickel are two metals which play an important role in modern civilization. They are usually found together in ores which contain iron, silver, and copper, in combination with arsenic and sulphur. The world's chief deposits of cobalt are located at Cobalt, (Ontario) and in the Belgian Congo, while the chief mines of nickel are at Sudbury (Ontario). The mines at Cobalt are also rich in silver.

Both these metals are silvery in appearance and take a high polish. They are slightly heavier than iron, silver, or copper at a lower temperature. Unlike iron, the metal is not magnetic. Sheet nickel is used in the production of all forms of dairy equipment, and nickel powder is used in many cosmetics.

The alloys of both nickel and cobalt are as alloy metals. When alloyed with iron, copper, chromium, silver, or with combinations of these, they form alloys of a very wide range of properties and uses.

Nickel steel is very hard and tough and is used for structural purposes and to make armor plate. Nickel aluminum is still harder and is used for railway switch-points and crossings. An alloy of nickel and iron known as permalloy made possible an increase in cable communication from 800 to 1,500 signals per minute.

Metal metal (67 per cent nickel, 20 per cent copper, 5 per cent iron, manganese, and other alloys) has high tensile strength and do not corrode easily. This type of alloy is used where pleasing appearance and resistance to cold corrosion are required, as in the manufacture of furniture fixtures, washing machines, and soda fountains. Rifle bullets have about the same composition as Metal metal.

Other alloys of nickel are resistant to heat and electricity and are used in electric batteries and electrical instruments. Nicromite (trade name) is a standard example of this type of nickel alloy. Invar (steel with 36 per cent nickel) is an alloy which does not expand and has no direct uses, but its alloys which are similar to those of nickel, are of growing importance.

The chief alloys are similar to steel to stein (trade name), a cobalt-tungsten alloy. It contains small amounts of tungsten or molybdenum. These alloys are very hard and are used for cutting tools, especially for lathe tools.

Provided For Islanders

London Solicitor Looked After People On Tristan da Cunha

There is a great deal of romance, and a certain amount of disillusion, perhaps, to be got out of being a Robinson Crusoe in real life. Mr. Glass, a Scots corporal in the Artillery, was one of a garrison of eighty-seven soldiers landed at Tristan da Cunha—the loneliest island in the world—when Napoleon was imprisoned at St. Helena. He and others, when the garrison was taken off, desired that they would like to live the rest of their lives there. They obtained the requisite permission. They drew up a proper constitution, whereby (no member of the island community) should assume any superiority whatever," and then they stayed. Mr. Glass had a Creole wife, and as the island was a favorite place on which to get shipwrecked the population gradually increased. Bachelors were occasionally supplied with a wife by a passing sea-captain. But it was Mr. Douglas Gane, a stalwart of Gray's Inn, who died a short time ago at the age of 72, who had all the romance and none of the disillusion. Forty years he had thought of Tristan da Cunha and had played the part of Merciful Provider to the descendants of William Glass and his friends. Destroyers, gunboats, and an occasional cruiser on the South African station have been told off from time to time to take stores, boats, necessities of all kinds, to Mr. Gane's protégés, and of late years even "luxury liners" have made one or two pilgrimages to the island. Just before he died he left a most interesting collection of documents connected with the original Mr. Glass and the foundation of the island community to the British Museum. If ever one man played the part of Providence to a group of his fellows it was surely Mr. Gane—Country Life, London.

Creates New Fund

"There is no sadder sight in the world than aimless and dispirited youth." The man who has just said that is a man of action—the Prince of Wales. He is not confusing his sympathy to words. As a national think-offering to celebrate the King's Jubilee the Prince announces the creation of a fund to extend the great work of all the important voluntary movements which guard the welfare of boys and girls at the critical span between 14 and 18—Manchester Sunday Chronicle.

Recipes For This Week

(By Betty Barclay)

1935 BROWNSIES

$\frac{1}{2}$ cup sifted cake flour
 $\frac{1}{2}$ teaspoon double-acting baking powder
 $\frac{1}{4}$ teaspoon salt
 $\frac{1}{2}$ cup butter or other shortening
2 squares unsweetened chocolate, melted
1 cup sugar
2 eggs, well beaten
 $\frac{1}{2}$ cup chopped walnut meats
1 teaspoon vanilla
Sift flour once, measure, add baking powder, and salt, and sift again. Add butter to chocolate and mix well. Add sugar gradually to eggs, beating thoroughly; then chocolate mixture and blend. Add flour and mix well; then nuts and vanilla. Bake in greased pan, 8 x 8 x 2 inches, in moderate oven (350 degrees F.) 35 minutes. Cut in squares; remove from pan and cool on cake rack. Makes two dozen brownies.

RICE A LA 1935

$\frac{1}{2}$ cups cooked rice
6 tablespoons sugar
 $\frac{1}{2}$ cups whipped cream
 $\frac{1}{2}$ cup nuts
1 teaspoon maraschino
Mix cooked rice with sugar, fold in whipped cream, flavored with maraschino. Chill. Serve in tall sherbets. Sprinkle each serving with nuts and garnish with additional whipped cream and red cherry.

The World's Ice Box

Temperature In Oimelok, Siberia, Goes To 100 Below Zero
The coldest place in the world, according to new Russian Arctic maps, is Oimelok in the Soviet Republic of Yakut, Siberia. The temperature there is reported to fall as low as 75 degrees below centigrade (103 degrees below zero Fahrenheit). Formerly Verkhoyansk and Yakutsk were considered the world's ice boxes.

The island of Jersey has systematically standardized its famous herds, prohibiting importation of any cattle since 1763, or about 40 generations of cattle.

When sleeping, woodpeckers hang head down by their claws.

THE CHORE GIRL

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

It would not be out of place for me to say a few words here about vocation and the various desires that people have for getting somewhere in life. In my case, my contemporaries speak of "desiring" certain things. Some "desire" in writing, others in something else.

You will never get anywhere if you "desire" something without action. If your desires and ambitions are directed, you need to work hard and to devote concentrated and industrious effort towards their attainment. If you are not quite sure of what you want, then get down to it, and write—and keep on writing. Remember Robert Bruce and the spiders. If at first your efforts don't meet with over-whelming success, don't despair. Redouble your efforts. That is the secret to success. It is difficult for me to write in this way, but believe me, the real underlying truth of the world can be summed up in a few prosaic expressions—and my main desire is to pass on to you a little timely advice of this kind.

C.G.: You are too much of a procrastinator at present even to get very far ahead with your ambitions. You need to cultivate your persistence, determination, and will-power. Never mind dreaming about the future, set to work to make your own future. In other words, your desire should be to get down to it, to do it, to make it. Success does not come to the average person like manna falling from above. It is usually the result of well-directed effort towards a clearly defined goal. Make up your mind definitely what you want to do, and then get busy learning all you can about it, and keep on trying. You can succeed if you want to, had enough, and are prepared to pay the price in self-sacrifice and hard work.

Mrs. A.: I cannot see much real happiness for you with your present husband. He is a man who is a drunkard, as you state, but he has a very violent temper, and absolutely lacks self-control. His brutality to you, and to your children, illustrates this even more than his drinking. He is not definite on the point. And his unwillingness to stop going out with other women shows that he is on having his own way.

There is only one thing for you to do, and that is to part with the plan you speak of in your letter. A separation will be best for all of you, and will at least give your children a real chance in life. I can't tell you exactly what you want to do, but if you want to have present circumstances. You are fortunate in being sufficiently self-supporting to be able to gain your freedom in the future. I do wish you more happiness in the future.

Would you like to know what your handwriting shows about your character? If so, perhaps you have some doubts about what you would like to know the truth? Send specimens of the handwriting you want analyzed, stating birthday in each case. Send them to me in an envelope, with a 3-cent postage stamp addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Avenue, Winnipeg, Manitoba. All specimens will be returned. Replies will be mailed as quickly as possible. Please allow about two weeks for your reply to reach you, owing to the volume of mail that is coming in.

Headgear For Regiments

British Army Order Designates
Body Full Dress

A British Army order, issued with a special view to the proper trapping for the King's Guard, makes the busby the full-dress headgear of all artillery corps, heavy as well as light, and also of the Royal Engineers.

The Royal Horse Artillery have worn the busby from time immemorial, but the Field Artillery and the Garrison Artillery, before the Great War, wore what was officially known as the "Helmet," Universal Home Pattern.

The R. H. A. retain the black saffron busby with white ostrich feather. Other Royal Artillery and the Royal Engineers are authorized to wear a black coney skin busby with white goat's hair plume. The full-dress headgear of the Royal Corps of Signals—post-war unit—will be a black lynx busby with scarlet plume.

Promotes Growth

A Russian surgeon believes he has discovered the secret of promoting growth in physically stunted human beings. He transplanted the thyroid gland of a 12-year-old child who had just died onto a stunted child of 15. The latter, it was said, shortly resumed his growth and in a few months was developing normally.

What do you think of mud as a goal?

"Well, it hasn't done much for the turtle."

For the entire day of her wedding a bride in Korea has her eye-lashes glued together, a tribal custom.

SUNDAY SCHOOL LESSON MAY 12

THE CHRISTIAN CHURCH

Golden text: So we, who are many, are one body in Christ, and severally members one of another. Romans 12:12.

Devotional Reading: Ephesians 2:11-21.

Explanations And Comments

14-15. On the Early Christians. Acts 2:41-47. In the days of Pentecost, about three thousand were baptized and became faithful members of the Christian community. They were steadfast in their attention to the teaching of Christ, to the observance of the Sabbath, to the breaking of bread and sharing in common the meal used by Jesus at the Last Supper. It should be made to retain moisture, and to add to this plenty of well-rotted vegetable manure. It should be incorporated. Digging in straw manure, green crops of oats, clover or even weeds, will prove a wonderful help both to sandy and clay soils, especially after this addition.

Under perennials screens there are many sorts of flowers, ornamentals and herbs and perennials which will come up from the ground year after year. Where screening is wanted these should be chosen. Of the vines there are the Virginia Creepers, some of which will cling without support. Dutchman's Pipe, Boston ivy, trumpet vine, Clematis and others.

New gardeners should guard against planting too deeply. Very fine seed of all kinds should be mixed with sand and the mixture sown. With small seeds merely pressing into the soil prepared soil will be best.

The general rule is to sow to a depth of three times the diameter of the seed.

This will mean

pressing into most flowers and vegetables seed as poor as that of beans, carrots, radishes, etc.

Seeds of onions, peas, corn and squash, which are large should be covered about an inch and a half deep.

Bulbs or corms, like the Dahlia, Gladiolus and potatoes may be put down quite a piece, from four inches to a foot.

GARDENING

Gordon L. Smith

Garden Soil And Care
An open position sloping towards the south or east and well drained loam makes the best garden. Of course it is impossible to secure these conditions in all cases, but the more fortunate in possessing a climate which will produce good vegetables on almost any kind of soil.

Under perennials screens there are many sorts of flowers, ornamentals and herbs and perennials which will come up from the ground year after year. Where screening is wanted these should be chosen. CHAPTER XVII—Continued

"Dustin tells a different story," suggested Garry. "There's the cattle rustled off the Hour-glass, Corse and Gray'll come across there. You better talk to your lawyer, too, Goddard, and get him to tell you what chancery is. It'll interest you in that false suit over Soda Springs. You're good for five years at least."

"You listen to me, Garry. If Sam Dustin says . . ."

But Garry swept on: "The State isn't especially anxious to get you for rustlin'. That lies with Joe Carr. What I can do, Goddard, is to protect your immunity for all acts up till now, provided you come back with a full and statement of all you know about old man Kane and this man Keene."

Spike breathed hard and considered the irons on his wrists. They were proof positive that Garry meant business. They had the goods on Dustin. He had always warned Sam that he was biting off more than he could chew. It would not help Dustin in the slightest degree. They had enough on Dustin now to hang him. If they failed to hang him, they would "put him away" for years. In the office-safe there was enough to get away with; a tribe over seven thousand dollars, proceeds from the looted cattle from the Hour-glass that no one knew of but himself and Dustin. He studied the three men before him.

"I make a statement when you promise me there'll be no publicity," he quavered.

"Sure. That's all right. You'll be subpoenaed later probably as a witness," said Garry. "All I'm tryin' to do is to save the County a long expensive suit. Your affidavit will show Dustin the sense in pleading guilty to second degree murder. That'll save his life. But he'll be locked up for life. . . . That'll mean really about twenty years."

"I . . . My God . . . I'll give you my affidavit to all facts I know in exchange for your written promise of immunity."

"Get paper and ink. I'll take that affidavit right now. Jameson here is a Notary Public," said Garry.

It took nearly an hour to get that affidavit for Goddard knew much more than he realized. Details were set down, fragments of talk that he

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regale and maintain it.

Nature has given to Canada in its magnificence abundance the natural Mineral Salts found in Little Canada. These health-giving Salts are recovered and refined by expert Chemists in the famous SASKASAL SALTS.

These SASKASAL Salts are given to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, revivifying products of Nature that are the simple story of SASKASAL Salts. Value added to you in regaining your lost health and maintaining it in joyous vigour. If you suffer from Consumption, Rheumatism, Kidney and Liver troubles—take SASKASAL Salts. As all Drug Stores—69c.

had from time to time with Dustin. His threats against Edith and his scheme to hold up Joe Carr at the last all came out. When Garry had that paper signed and sworn to and witnessed by Stone and himself he turned to Goddard.

"I suppose Dustin'll be admitted to heavy ball in this case. His lawyer'll look out for that. But if he gets out, I'd hate to be in your shoes when he learns of this statement."

Spike Goddard was of the same mind and the moment Garry's car shot around a turn in the Sego trail he was the busiest man in Cresway County. In ten minutes he had the hall-safe opened. In ten more he had packed a valise that he hung into the back seat of the battered little ranch-car. The fat old cook at the Broken Spur was the last man to see him as he stepped on the gas and hurried that car along the open trail to the South.

Armed with that affidavit Garry and Stone headed straight for the office of the County Sheriff where they were met by Master Peyley, the reticent little attorney, who had protected the Broken Spur for many years. Masters scanned the paper and the other proofs that Lorton frankly laid before him.

"Oh, you'll get an indictment of course," said Masters. "And you've got enough to put up a fight. I can't say off-hand how well you'd stand in this case of young Keene. I understand he died . . ."

"Well he didn't," snapped Stone. "Listed here. I had to get time to investigate the Kane business. I wanted time to look around so I got Epps to give out a report that Keene was dead. I figured that'd make Dustin show his hand and it did. He tried at once to make Edith Carr marry him. He said he'd save her father if she'd marry him. I was perfectly willing to sacrifice Peyley to get the girl. It was quite an accident that we learned that Dustin killed Kane."

"That affidavit would send Dustin up for twenty years even if he hadn't murdered old Kane," said Lorton. "This clears old Carr of course. We might get him over here, Sheriff."

While Carr was free, Masters interviewed his client and told him of the affidavit that Goddard had given and for five full minutes Dustin was speechless. Then:

"The . . . He ripped out a vitriolic name. "He's sent me up for life at least to save his own dirty hide. But he can't get away with it. You tell Garry that that little crook has jumped the state for the border. He's certainly taken along with him seventeen thousand dollars that we had in the wall-safe at the Broken Spur."

In ten minutes Sheriff Garry had the wires red-hot and six hours later action was had when Layton of the Border Patrol wired in that they had picked up Goddard at Willow Crossing on the Big River just as he was preparing to cross into Old Mexico . . . and safety. Garry sought Stone and told him:

"It puts a different complexion on Goddard's status," he said. "I promised him immunity but he did this afterwards. This'll jail him along with Dustin. It ought to help clear up the mess of the Hour-glass too. When he gets back and sees old Joe Carr when he learns all that has happened."

Carr, brought from Garry's house, listened dazedly to the complicated tale. When silence came he leaned forward and scanned Stone closely.

"I don't seem to get this quite straight," he said. "What I want to know . . . How is young Keene? Of course I didn't shoot him but I can't explain what took place. I'd like to call up Edith on the phone and tell her though. She'll want to know."

"You might tell her," said Stone, "that Gerald Keene will drive out to the Hour-glass with you in a little while."

"How do you know he will?" snapped Carr. "Can't he answer for himself? For God's sake get him from Doc Epps if he's not seriously hurt."

"That's all right," said Stone easily. "I happen to be able to speak for him because . . . I AM GERALD KEENE."

A bomb-shell falling between them would not have caused more astonishment. When it partially subsided Stone explained.

"Burwell of the Cato bank told me that Dustin and Goddard had systematically looted the Hour-glass. I knew of course that as Mr. Carr's partner, I'd never get a hair of evidence so I took Duro Stone's name. Duro was my foreman on a little ranch I own up in the Wind River basin. I came on down here with a letter from Gerald Keene to Mr. Carr and I got a job as Duro Stone. I saw almost at once how things were going. Mr. Carr was pretty well crippled up and Dustin and Goddard were on the prod. Then I found out about the cattle being swiped by the men from the Broken Spur . . .

I couldn't do much because it would be only the evidence of one man and he a stranger. Then I found out about the gold-mine and after the other things came to light. Of course I knew at once that the scoundrel wanted to marry Edith and was trying to force her consent. When Keene . . . I mean, the real Stone . . . was shot I had to persuade Epps to give out word of his death. I figured that would make Dustin show his hand and it did. I had to swear out a warrant for Dustin's arrest on the non-murder charge because I needed three days to go up and investigate Peyley Greg's story about Kane's death and I didn't want Dustin knowing about it. That's why I had Garry pinch him. I couldn't have concealed my identity very long though. Crewe spotted me. You would have too, Mr. Carr. If you hadn't been so crippled that you couldn't get around."

"Does Edith know?" asked Joe Carr.

Stone shook his head. "By the way," he said, "we'd better send for the real Duro Stone. He's gettin' darned tired of bein' dead."

In the riotous hour that followed, old Joe Carr's eyes seldom left his recent employee, Duro Stone. He followed every little movement with an interest that was pathetic.

"Now that I know who you are, I can see Peter Vinton in your every move," he said. "I want to see Edith's face when she's told."

"So do I. Let's get out to the Hour-glass right away," said the new General Keene ingeniously.

Edith, warned by the telephone, was standing on the porch. The sun, shining full in her eyes, filled them with a curious light and made a bright nimbus about her head as she stretched out a hand to the new General Keene.

"I hardly know how to greet you," she said half-shyly. "I was prepared to give Duro Stone a warm welcome . . . Duro Stone who saved my father and me and the ranch but now was speechless. Then:

"'B'low . . . 'B'low . . . " He took the words . . . "Let 'em all go in the house, Edith. I've got something to tell you."

They watched the others go inside the house and they stood watching the sun set behind the last blue line of the foot-hills. A golden glow seemed to fill the air with an aureate dust and after a coyote set off his shrill weird yelling. Stone . . . now General Keene, took both her hands in his and drew her to him. She came unresistingly and was drawn into his arms.

Rather, it is like a bird Singing, who knows why? By what winds of fancy stirred Into melody?

Joy is careless where it dwells, How it comes or goes; Who can say what charms impels Song that heavenward goes?

I had thought my joy was spent, Flattered from my hand; I had sought to find content In a silent land.

"No longer, Honey!"

"To pose as an amateur," she laughed. Then she backed away from him and looked at him as Frank Crewe came out, took one hasty glance and fled inside the house. The next moment darkness shut down on them and the desert, night began.

THREE END.

The general tendency of more than nine persons out of ten is to spend what they get. If they are spending little, you may reasonably conclude they are making little.

Archaeologists digging at an old Alaskan village have found for the first time wooden canoes made by Eskimos.

This Name Means Extra Fast Relief From Pain

Get tin of 12 tablets or 100 of my druggists.

DOES NOT HARM THE HEART

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking effect" even a bad headache, neuralgia or rheumatism almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer on the label of any cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

Relieve Heart Disease

New Operation Reduces Activity Of Thyroid Gland

A new operation for heart disease was reported to the American College of Physicians meeting in Philadelphia.

The operation hobbies the thyroid gland, and is one of a series of similar, rapid steps made in the last two years toward relieving the suffering of heart victims.

The operation was described by James Alexander Lyon, M.D., and Edmund Horgan, M.D., of Washington. They reduce the activity of the thyroid, one of the body's chief energy producing machines, by cutting down both its blood and its nerve supply.

The arteries running to the gland are tied off, and with them the gland's connection with the sympathetic nervous system. The gland is hobbies, that is, does not entirely stop.

The energizing product it pours into the blood stream, thyroxin, is discontinued. The result is an easing off on the work done by the heart.

The operation has relieved five cases of angina pectoris of their pains. It has relieved three cases of congestive heart failure, a condition when the blood is sluggish.

Changes Their Color

Zoologist Finds X-Ray Has Queer Effect On Mice

Colored mice are now available in St. Louis, in all colors except green, bright blue and orange, and prohibition repeal has nothing to do with it. It's science. This was announced by Dr. George D. Snell, assistant professor of zoology at Washington University, who has been studying the effects of X-ray in the heredity of mice. A combination of dieting and exposure to the roentgen rays produced the startling coloration and in some instances strange malformations and abnormalities, Dr. Snell reported.

The elaborately decorated drum from which the counterfeits are taken in the sweepstakes draw was found in the debris, a mass of twisted steel.

The building, of frame and brick construction, was owned by the Saorst (Irish Free State) government and contained the sweepstakes records. It was situated on Abbey street, near O'Connell. The sweep draw was held on its second floor in a large room once used as a ballroom.

"So do I. Let's get out to the Hour-glass right away," said the new General Keene ingeniously.

Edith, warned by the telephone, was standing on the porch. The sun, shining full in her eyes, filled them with a curious light and made a bright nimbus about her head as she stretched out a hand to the new General Keene.

"I hardly know how to greet you," she said half-shyly. "I was prepared to give Duro Stone a warm welcome . . . Duro Stone who saved my father and me and the ranch but now was speechless. Then:

"'B'low . . . 'B'low . . . " He took the words . . . "Let 'em all go in the house, Edith. I've got something to tell you."

They watched the others go inside the house and they stood watching the sun set behind the last blue line of the foot-hills. A golden glow seemed to fill the air with an aureate dust and after a coyote set off his shrill weird yelling. Stone . . . now General Keene, took both her hands in his and drew her to him. She came unresistingly and was drawn into his arms.

Our Democratic Sovereigns

Amusing Episode Of Visit Of Royalty

150 Years Ago

To-day the members of the British Royal family are most democratic. In celebrating the Royal Jubilee the British people feel their King and Queen are not only their sovereigns but their friends. And if this detracts in any way from the romantic atmosphere of royalty it adds infinitely more to the human relationship—a deeper and warmer bond than the merely remote and picturesque.

We could never imagine our King George and Queen Mary permitting such stilted behaviour among their personal friends as was exacted 150 years ago by George III when he paid what was presumably a friendly call on Mrs. Delany. The visit is thus amusingly described by Agnes Repplier in her charming book "To Think of Tea."

"When the king entered Mrs. Duff's parlour, all its occupants except the hostess backed respectfully to the wall, and stood there at attention. Then Miss Post backed out of the door and brought in two extra candles which she placed on the table; backed out a second time and brought in two more candles which she placed on the piano; backed out a third time and brought in His Majesty's tea on a large silver tray with sugar and cream and butter and a saucer and a spoon. While he drank it she returned to her station by the wall. When he had finished, she took his cup, backed out of the room a fourth time and brought him a fresh supply. It was well he did not drink sixteen cups in Dr. Johnson's fashion, or Miss Post's legs would have given way under her. Of course no one took tea with the king. He drank it in solemn state . . . and took his departure, leaving the company overwhelmed by a profound sense of his condescension."

Sweepstakes Building Burned

Fire In Dublin Destroys Structure Owned By Irish Free State

The Plaza building in Dublin, where prizes are drawn in the Irish Hospital Sweepstakes, was swept by fire, rumored to be of incendiary origin.

None of the 300 young women employed in the building were at work. Many of them later joined the throng of spectators and wept as the walls of the blazing structure collapsed with a tremendous roar.

The elaborately decorated drum from which the counterfeits are taken in the sweepstakes draw was found in the debris, a mass of twisted steel.

The building, of frame and brick construction, was owned by the Saorst (Irish Free State) government and contained the sweepstakes records. It was situated on Abbey street, near O'Connell. The sweep draw was held on its second floor in a large room once used as a ballroom.

"So do I. Let's get out to the Hour-glass right away," said the new General Keene ingeniously.

Edith, warned by the telephone, was standing on the porch. The sun, shining full in her eyes, filled them with a curious light and made a bright nimbus about her head as she stretched out a hand to the new General Keene.

Signed Declaration

MRS. ETHEL DUFF

To help others Mrs. Duff, 125 Wellington Street E., Charlton, Ontario, swears to the facts before her, notwithstanding how fruitless lives even a bad husband, parents of children, can be.

It was George III who, in 1760, was bothered with stomach trouble in less than a month. Mrs. Duff generously made her statement in this fashion so everyone can see that she is a good wife.

Nothing I can do will help me. I am a good wife, too, and I am a good mother.

Under Thy wings my God I rest, Under Thy shadow safely lie; By Thy own strength in peace possessed.

While dreading evils pass me by.

A heart rejoicing in God delights in all His will, and is surely provided with the most firm joy in all estates; for if nothing can come to pass beside or against His will, that soul cannot be vexed which delights in Him, and hath no will but His, not only when He shines bright on them but when they are clouded. That flower which follows the sun doth so even on cloudy days. When the sun does not shine it follows the hidden course and motion of it. So the soul that moves after God keeps that course even when he hides His face, and is content to do His will in all conditions.

Little Helps For This Week

The Lord shall preserve thee from all evil. Let He preserve thy soul. Psalm 121:7.

Under Thy wings my God I rest, Under Thy shadow safely lie; By Thy own strength in peace possessed.

While dreading evils pass me by.

A heart rejoicing in God delights in all His will, and is surely provided with the most firm joy in all estates; for if nothing can come to pass beside or against His will, that soul cannot be vexed which delights in Him, and hath no will but His, not only when He shines bright on them but when they are clouded. That flower which follows the sun doth so even on cloudy days. When the sun does not shine it follows the hidden course and motion of it. So the soul that moves after God keeps that course even when he hides His face, and is content to do His will in all conditions.

Labor Under Handicap

Child With Detective Hearing Or Sight Often Neglected

"There is no child so completely neglected as the child who is losing his hearing," says an investigator. "He does not even understand his own plight; he feels no pain; he only knows the impatience, the hard knocks, the lack of sympathy or the bitterness of being passed over or ignored. There are many thousands of these hard-of-hearing children in the State of New York. Some of them are being discovered through surveys."

The New York State Federation of Women's Clubs has two hard-working committees, attacking what is often the origin of juvenile delinquency and the quotation shows their finding. The child with eye-defects is also isolated and often anti-social.

A Country's Real Enemies

Are Not Those Which Exist Across Some Boundary

Every nation of the world is laboring under the terrible illusion that its enemies exist across some geographical boundary. We do not slay our enemies when we slay our brothers; we merely multiply them. Hate, fear, ill-will, greed, ignorance, pride, racial and nationalistic bigotry—these are the real enemies of my country, and your country, and every country—Dr. Harold Phillips.

Remembered The Nurse

Visitors to the house in the daytime made so much noise that the night nurse could not get sufficient rest to prepare for her work.

One day she happened to mention this to the doctor, who wrote a large notice with the words: "Please remember the night nurse," and placed it on the hall table.

Next evening, when she came on duty, she found, beneath the notice, a shilling, a sixpence, and a few coppers!

Many new railway lines and extensions are being constructed in China.

A porterhouse steak and a medium priced automobile cost about the same per pound.

Blairmore, Alta., Thur. May 9, 1935

PROHIBITION ASSOCIATION
GOES OUT OF EXISTENCE

Unique in the history of the temperance movement is the set-up and organized plan of co-operation adopted by a joint convention of delegates officially representing the various church denominations, the W.C.T.U.'s, of the province and other provincial and local bodies interested in temperance work, held in Edmonton on May 3rd, 1935.

The name chosen to represent the nature of the newly formed co-operative group is "Associated Temperance Forces of Alberta."

Their stated objective is the eradication from Alberta of the beverage alcohol drinking custom.

Under the plan of organization adopted by the convention, the province is divided into 65 self-governing districts, each containing approximately 15,000 population. Each district will have a district co-operating council comprised of the president and secretary of each church congregation, Yojing People's Society, W.C.T.U., U.F.A., U.C.W.A., Women's Institute, Community League, Motor Association, Board of Trade or other co-operating unit within the district. The district boundaries are those suggested by the provincial government for enlarged municipal districts and proposed health district purposes.

Each of the 65 district councils will be represented in a provincial co-operating council by its president and secretary. The executive of the provincial council will be further strengthened by a representative at large from each religious denomination, and by a further advisory committee chosen at large.

This province will thus, for the first time in its history, be adequately organized, from the bottom up, instead of from the top down as formerly; and the result is expected to be an immediate increase in the strength of the temperance movement.

R. O. Allison, Pincher Creek Conservative candidate, states in part "that a government cannot distribute dividends or services without resorting to borrowing, confiscation or taxation; that the States does not owe and cannot pay the individual a monthly dividend, but does owe him or her an opportunity to earn one under fair conditions; that to the individual (and there are many) who is unwilling to give honest labor for honest wages, this country owes less than nothing; and that for the unfortunate (and there are many through circumstances over which they have no control) provision for health and other services must be made."

Whatever the present U.F.A. government may do in the way of making it difficult and dangerous for the newspapers to deal with court cases will not exonerate Mr. McPherson and Mr. Brownlee from their actions. Rather will it impress on the people that the government is more concerned about the feelings of these two men than it is about basic democratic principles, a main one of which is the freedom of the press. The Alberta government has done some very foolish things in its career, but its obstinacy in refusing to ditch this legislation is one of the most short sighted of all. Instead of trying to antagonize all the newspapers, the government should be seeking to make friends. Right now, with the Aberhart Social Credit movement a potent force in the province, the U.F.A. government needs all the friends it can get.—Hanna Herald.

A VALID SOCIAL CREDIT SCHEME
(A Jubilee Message by Rev. William A. Crawford-Frost)

The St. George's Society of Baltimore asked me to preach a sermon in St. Michael and All Angels' church there, on the occasion of the coronation of King Edward VII, and it was prepared when the illness of the King postponed the coronation. The sermon, although never delivered, was published, and in it was prophesied, on the basis of heredity alone, that Edward VII would prove to be one of the greatest monarchs, because he had had the finest father and the most perfect mother that any man ever had. That prophecy was fulfilled and Edward VII became not only the first gentleman in Europe, but the most adroit diplomat and the best beloved monarch of his day. Now for twenty-five years his son George V has followed in the footsteps of his adored grandmother and his kindly father. Speaking as a man who was born a British subject and became an American citizen, chiefly in the hope of drawing together the English-speaking peoples, as is provided by a prophecy I made in Charlottetown, Prince Edward Island, in 1888, in a letter to the New York Herald which was widely quoted, I say that King George V, has proved that he was the choice of God to bear the standard of peace and prosperity throughout the world, because all the nations today look up to him and to President Roosevelt as their greatest hope for world peace, not only because each is an ideal Christian gentleman, inspired by God for the promotion of human brotherhood, but also because each of their nations has already done miracles in recovering from the worst depression the world has ever seen.

Ever since 1883 I have taken an interest in the guidance of terrestrial affairs by God, through suggestion, considering myself called to be an ambassador of His, and I have for many years been recognized by England, France and the United States as an international inventor and economist whose advice has been found useful. Therefore, since everybody now is asking for suggestions on the subject of Social Credit, I beg to offer a scheme for it that may be the means of putting down false hopes and yet a solid foundation for real progress towards Millennial Peace and Happiness.

My plan is as follows:

1. Valid Social Credit must be expressed in terms of gold, silver, or other hard money, in units authoritatively and adequately fixed. Paper itself has practical no value. They used German paper marks at one time for wallpaper. Gold marks were valuable, but paper script was worthless.

2. The issuers of valid social credit certificate must have on hand, or available at the time of issuance, enough hard money to insure the fulfillment of all obligations at the time specified, or shortly thereafter. There must be such a time specification, and such certificates must be negotiable as legal tender and their acceptance should be compulsory.

3. Any authority that issues social credit certificates, unless it conforms to Item 2, is in the same position morally as would be any private individual who issues a check on a bank in which he has no funds. It would be obtaining money, or goods, on false pretense, i.e., pretending to have something which he did not have, or to pay something which he could not be sure of paying.

4. Social Credit should be local, or state wide, or provincial, or national, or world wide, because it applies to municipalities, to states, or provinces, to nations, or to the world as a whole.

5. Valid social credit, whether local, or state wide, or provincial, or national, or world wide, should be backed by hard money that is like water in reservoirs connected together by canals in such a way that a shortage in any one reservoir can be made up by drawing on all the re-

servoirs, so that all is behind each.

6. World Social Credit should be issued only by the joint action of the representatives of all nations.

7. National Social Credit should be issued only with the consent of the Central World Authority.

8. Local, state wide, or provincial Social Credit, should not be issued without the consent of its own national government, and if it is above an amount to be fixed by international authority, it must have the consent of this said international authority, as well as the consent of its own national government. The reason for these provisions is obvious. Any local, state wide, or provincial government that issued social credit, involving heavy taxation of the rich, would drive the rich from one municipality to another, or from one state to another, or from one province to another; and any such national Social Credit legislation would only drive the rich from one nation to other nations unless the Social Credit scheme were world-wide and uniform in the treatment of the rich.

9. In order to carry out a scheme that must provide for money ahead sufficient for human need, there must be established local, national, and international Human Endowment Funds. The same principles that have been found necessary in other fields of finance must be applied in this. Funds, or goods, must be set apart for the fulfillment of future requirements of this, the greatest of all human efforts, just as they have had to be set apart for lesser aims. Things of this kind are not left to chance. They must be definitely and adequately provided for by suitable financial reserves, after proper actuarial research and advice.

10. When the world reaches the stage where it can produce enough of everything in one year to keep everybody for two years, the millennium will have come. I believe it reached that stage potentially on Easter, 1933, that is to say, it reached the stage of sufficient productivity at that date. The chief obstacle in the way of millennial realization from that time on has been ignorance and greed in regard to the proper distribution of human products.

11. In order that there can be carried out any wide social credit scheme, there must be a system of universal uniform coinage.

12. I suggested to the World Economic Conference, held at Ottawa in 1932, a uniform coinage scheme, in which the unit of value should be a silver dollar 90 per cent fine.

13. I further suggested that this silver coin should be called "X" to make it international, and that it should be everywhere normally regarded as equal in value to one bushel of medium grade wheat.

14. Also I declared that the value of gold should be expressed in terms of this silver unit, whether the gold rises or falls.

15. Further, in written communica-

tion with President Roosevelt, Rt. Hon. Neville Chamberlain and other national authorities, I stated that the value of both silver and gold throughout the world is purely arbitrary and that, if all the nations agree to it, any reasonable valuation whatever may be speaking of my currency suggestions, wrote me: "Your views are greatly appreciated." It has evidently followed them, because it has pushed up the prices of silver and gold enormously.

16. Any valid social credit scheme must depend for its success upon there being enough gold, silver, or other hard money, available to meet the needs of production and distribution, locally, nationally and internationally.

17. For this reason, before any Social Credit scheme can be successful, both gold and silver must be universally monetized and so increased in value as to provide sufficient of each metal to meet the needs of the world.

18. Any scheme of social credit depends upon the powers of production and distribution of a community, or a nation, or of the world as a whole, in comparison to the number of people to be fed and sheltered therein.

19. There are many old people, sick persons, chronic invalids, and others

who, in order to make any scheme of social credit practicable, should come to look at death more as the Japanese do, namely, that it is nothing of which to be either ashamed or afraid.

20. If such sufferers believed in a

loving God, in the persistence of personality after death where such preservation is deserved, and believed in the absence of any Hell, except the earth, and that they would have more to gain than to lose by leaving this troubous planet, there would likely be enough people to seek the honor of legal martyrdom to bring Social Credit soon within the realm of the practicable. When the planet was sparsely inhabited, God's will was against this. Now He favors it, because it means the greatest good of the greatest number, and will achieve the maximum of human happiness, which is the object of the millennium, and to attain which the total amount of human suffering must be subtracted from the total amount of human enjoyment and all pain must be eliminated so as to be possible so as to make the balance of human pleasure as large as it can be.

21. Above all, Social Credit depends on social peace. The problems of war and poverty go together and must be solved simultaneously and nothing will do that but a revolution in human affections. Hatred must diminish and must give way to the reign of love, with loyalty to a rightly understood personal God as its basis and love to our fellow men as a corollary. The universal test of a valid Social Credit scheme must be to do unto others as we would they should do unto us. This last implies a fairer distribution of wealth by means of heavy taxation of unduly large incomes.

22. Belief in a merciful God, who can only advise and leaves us our free will, is the first step. Faith in a happy hereafter is the second. The adoption of the Golden Rule is the third. All the rest will follow from these three. When this will happen depends upon ourselves. In spite of wars and selfishness, the entire world is rapidly coming to this conclusion.

Religion should be mixed with everything, including economics, but it must be a reasonable religion and the economics must be honest.

Before Social Credit will be pro-

perly feasible, each nation must work

for the good of all and all nations must support each other.

opened a branch warehouse at Fernie.

BLAIRMORE UNITED CHURCH

Rev. Albert E. Larke, Minister

"Serve the Church that the Church
May Serve You."Services Sunday, May 12th, the
minister in charge.11 a.m.—SENIOR SCHOOL
2 p.m.—JUNIOR SCHOOL
7:30 p.m.—PUBLIC WORSHIP.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, May 12th:
Morning service at 11 o'clock.
The Bible class will meet every
Thursday in the church at 7:30 p.m.
Everyone welcome.

HILLCREST UNITED CHURCH

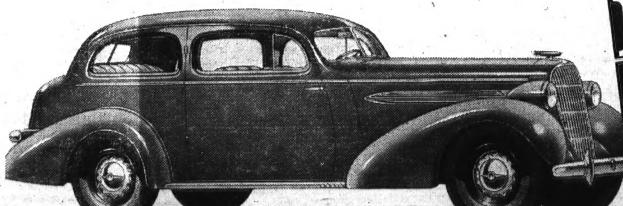

Rev. John Wood, Minister

Everywhere today men and women are being moved deeply, and moved righteously, by material aims. "Humanity is once more on the march."

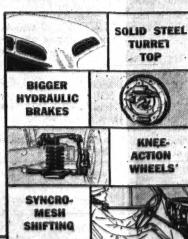

Urgently we press the claim of
religion to the leadership, for we are
certain that Wilson was right when
he declared that "our civilization can-
not survive materially unless it is re-
deemed spiritually."Topic on Sunday at 7:30, "Loyalty
to Christ."

An Aberdonian had been invited to attend the funeral of a neighbor's third wife, and as he had attended the funerals of the first two, his own wife was surprised when he informed her that he had declined the invitation. She continued to press for a reason, so at last, after a great deal of hesitation, he told her: "Well, Mary," he said, "I feel a bit awk-
ward to be accepting Brown's civili-
ties when I never have anything of
the sort to ask him back to."

Confidence

Confidence is the bedrock on which human society rests. The entire world in all its varied activities is motivated by confidence. Destroy confidence and our civilization would disappear. It has been long accepted as a truism that there is in life but one absolute certainty, which is death. And, says one writer, all other activities, to a large extent, are dependent upon confidence for their being.

There is no way to hang on to confidence, but to move persistently in its full measure, one who carries with him a desire and an urge to accomplish our desires or to transmute our hopes into realities than that of confidence. It has been said that it is a plant of slow growth. Yet it is one that can be nurtured by individuals and groups of individuals and brought to full fruition with little effort. It is a plant that fails in that failure in a particular situation can so mislead an individual by suggesting that it is not a question of application. Sometimes it is an outgrowth of reason, sometimes instinct, but however acquired it is, as stated in our opening sentence, the bedrock on which human society rests.

A house is established on confidence, the confidence a man and a woman have in each other which begets respect and love; confidence which children have in their parents; confidence which parents feel of the children, and in turn which they repose in their offspring. Lacking confidence, a home would be impossible to establish.

A successful business can only be built up and maintained where there is confidence, the confidence which one partner reposes in another, which is confidence which he has in the qualifications, ability, and energy, extends to his employees, and which employees have for their employers, and finally which the business man has in his customers and his customers possess for him. Lacking such confidence, a business will inevitably end in bankruptcy.

So, too, is the life of the community founded in confidence. First there must be confidence that there is a future for the community or there will be no community because people would not remain to constitute one; people who constitute the community group must have confidence in the goodwill, ability and enterprise of their associates, otherwise confidence in the community itself would be lacking. And what is true of the community is true of the individual.

It is not only essential that the citizens of a community or nation possess confidence in themselves and in each other, but it is vitally necessary that other communities and nations repossess confidence in them if they are to achieve the greatest success and rise to a proudest place in the world. When confidence between peoples and nations is lost, the world is headed for trouble.

Furthermore, when a community or nation assumes an attitude or adopts a course of action which results in a withdrawal of confidence from it, such community or nation is bound to be the sufferer.

Once a man breaks faith with another he destroys what, after all, is his greatest asset, his reputation, and with his reputation he loses confidence in himself, and long time to win the confidence of others, but by one act it can be quickly destroyed and forever lost. And if a community, built up as communities are by the confidence that people have given to them, proceeds to evade its responsibilities and repudiate its obligations, it thereby destroys its most valuable community asset.

A dollar bill is only valuable because of the confidence which the public has in the Government or bank issuing the bill; lacking such confidence the piece of paper would be utterly valueless. If a pupil lacks confidence in his teacher, the teaching will be largely in vain. The sick patient's confidence in the skill of the doctor, the confidence of the passenger in the dispatcher at the telegraph key, of the trained engineer in the locomotive cab, few people could be induced to undertake a railway journey.

Let the reader consider what his or her own position in life would be if there were no confidence in the people, citizens, in the institutions of their nation, in everything animate and inanimate which surrounds them. They would become fit inmates for a madhouse. Without confidence mankind simply could not continue to exist.

Notwithstanding this great truth, the fact remains that throughout the world, to do every effort and bring put forth to destroy confidence, practically all things. Men and women are asked to place no confidence in the existence of God, to abandon their formerly held religious beliefs, to reject forms of government which it has taken centuries to develop, to surrender confidence in themselves, their convictions, abilities, talents and energies; in a word, their individual liberties, and, because they no longer have confidence in themselves, to become mere cogs in an economic and political machine operated by forces over which they have surrendered all control.

Lose confidence in yourself and you destroy yourself, because with loss of confidence there is loss of self-respect, loss of self-control, loss of ambition, loss of initiative and the power to do.

A Whale Of A Shark

The largest shark ever caught in South African waters was trapped in a fisherman's net at Hout Bay, near Cape Town. It was 27 feet 6 inches long, 10 feet in girth, and weighed five tons. It fought madly for freedom for two hours before it was finally hauled into shallow water. Even then 14 bullets were needed to kill it.

Moving Church Uphill

To make way for the replanning of the city, the ancient church, Belvárosi Templom, in Budapest, Hungary, is to be moved 16 yards uphill. It will be eight yards higher in its new position. Special machinery for the operation has been invented by Lajos Fridrich, a well-known engineer. The moving will cost \$250,000.

Exhibition In Belgium**Big Fair In Brussels Bid For World Peace**

Belgium's gesture to the cementing of the peace of Europe is an International Exhibition opened at Brussels, April 27.

Amid the tumult and shouting, the talk of impending conflict of nations and the strivings for peace, Belgium projects her "World's Fair" in the hope of forwarding the friendship of nations and helping to re-establish the business of the world on a firmer basis.

With 400 acres of grounds and 150 palaces and pavilions the promoters have planned to make the exhibition the shop-window of the nations. Practically all countries of the hemisphere have places in the great show.

Science and technology, commercial exploitation and industrial development of the great modern discoveries are special features of the exhibition.

Celebration of the centenary of the first railway line and the first train between Brussels and Malines in 1835 furnish an opportunity for giving special attention to transport and means of communication.

In the departments of historical development, commemoration of founded of the independent state of Congo has given this section an impetus.

Ancient and modern art, domestic and foreign, is shown in special buildings. With the ancient art will be seen tapestries, of which Belgium has been one of the most reputed centres, together with sculpture, pottery and lace.

Figures Are Interesting**Statistics Show Important Place Occupied By Canada's Railways**

The place which Canada's railways occupy in the Dominion's affairs is strikingly shown in some statistics recently released. Last year 66,626,000 tons of freight were transported by Canadian railways and 17,952,000 passengers travelled on their trains.

The total payroll of Canada's railways for the year amounted to \$141,000,000 paid to an average of 119,000 employees. The railways are one of the largest consumers of Canada's coal output. Some 1,000,000 tons in this respect covering Canadian National lines show that out of every dollar of the \$151,936,078.56 spent last year in operating the railway, approximately 10 cents went for fuel. The fuel bill for locomotives amounted to \$14,705,992.33 for the year; the water bill amounted to \$893,700.04. Approximately 60 cents out of every dollar of expenses went for labor.

Information as to commodities handled over Canadian National lines throughout the year gives a sidelight on the extent to which Canada's mining industry has grown. Products of the mines constituted the largest portion of the total revenue tonnage, 12,092,546 or 32.7 per cent. Agricultural products account for 23.1 per cent., forest products 12.2 per cent., animal products 2.7 per cent., miscellaneous 29.8 per cent.

Girls Are Best Spellers**Work Harder Than Boys Opinion Of Toronto Teacher**

Girls are better spellers than boys "probably because they work harder."

G. H. Dickinson, teacher at the Central High School of Commerce, Toronto, says, "a survey of the spelling of 16,000 Canadian children which he will present to the commercial section of the O.E.A. 'Bourgeois' was the word which the children found hardest to spell," he commented.

The easiest, he found, was 'accordance.' The survey, he said, showed that pupils in commercial schools are better spellers than students in academic and technical schools.

The February movement of bacon from Canada to Great Britain, viz., 14,765,200 pounds, was almost double the volume for February, 1934. The total value of bacon exported during January and February, 1935 was \$370,600 pounds, an increase of 9.223,600 pounds over the shipments in January and February, 1934.

An Old Idea

Aristotle once counted the teeth of his housekeeper and those of a male servant. He found four less teeth in the mouth of the woman, and for hundreds of years it was taken for granted that men had four more teeth than women.

1,000 pounds of shelled popcorn. Mount Ararat, on which Noah landed the Ark after the great flood, is now more than three miles above sea level.

In Bed With Neuritis Every Winter**Until Kruschen Brought Relief**

"For three years," writes a woman, "I have been bedridden about three months every winter with neuritis in my hips and legs. Last winter I started taking Kruschen Salts, and got relief from the first dose. This winter I have not been in bed at all."

Neuritis is a result of impurities in the blood. And it is the impure blood, circulating all over the system and taking up impurities in the tissues, that causes these salts to be safely taken to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Took Part In Convention**Blind, Crippled Child Astonishes Delegates With Her Skill**

Kindness which all good school teachers feel towards children came ready for Lucille Lemp, a little blind and crippled girl from Tavistock, Ontario, who took an important part in the public school department's session of the Ontario Education Association's convention held recently in Toronto.

Lucille was brought, by her parents, Mr. and Mrs. John K. Lemp, especially for the occasion. In her pink frock pink she evoked the kindliest of attention, as she was carried onto the stage by her proud father. But when she began to give her number, admiration and sympathy went together in the hearts and minds of delegates who proudly saw in the child's artistic and skillful demonstration an example of what a home instruction unit under the auxiliary classes department of the Ontario Department of Education had been doing for physically handicapped children.

Lucille played her harp for an audience which applauded her when she was through. With excellent expression in her pleasant voice she recited a poem which she had written. While the delegates, with rapt attention, watched her cheery, earnest face, she wrote a business letter on a typewriter with a Braille keyboard. Using a relief map of the British Isles she gave her audience a lesson in geography.

Necessity For Canada**Control Of Wheat Supply Needed****Stated British Economist**

Regulation and control of wheat supply is a necessity for Canada and other dominions exporting wheat to Great Britain as Britain's population is no longer increasing and her wheat demand is stationary, Sir Josiah Stamp, noted British economist, stated at Montreal.

Chairman of the London, Midland and Scottish Railway and a director of the Bank of England, Sir Josiah was in Montreal while en route with Lady Stamp from Quebec to New York on a combined business and pleasure trip to the United States.

Sir Josiah, who headed a royal commission on the Canadian wheat situation a few years ago, hoped any increased business to the Canadian wheat farmer as a result of the United States' dust storms would not start him increasing acreage and crop production under the impression the benefit would be permanent.

Popcorn seed imported into Canada from July 1, 1934 to March 1, 1935, amounted to two pounds only. During the past winter local growers at Magrath, Alberta, marketed over

Although far south of the Arctic Circle, part of Labrador's coast is made essentially Arctic in temperature by cold ocean currents.

Chlorophyll, the green coloring matter in plant leaves, apparently is the only means by which solar energy is made available to the plant.

The Mauretania Retires**Launched In 1906, This Vessel Covered 1,500,000 Miles During Its Years Of Service**

The Cunard liner Mauretania, which has just been retired, was planned to be the fastest ship in the world, and not only won this distinction, but kept it for 22 years.

The Mauretania was built at the shipyard of Swan, Hunter and Wigham Richardson, at Wallsend, near Newcastle-on-Tyne, England, and was the first ship to have quadruple propellers.

The hull was launched on September 26, 1906, the Dowager Duchess of Roxburgh performing the launching ceremony. The ship's final trials took place on November 3, 1907, and she started on her first voyage to New York on November 19, 1907, making the crossing in five days, five hours and 10 minutes, and thus breaking all existing records at that time.

As late as July 1933, the Mauretania, on her way from Havana to New York, covered 112 miles at an average of 32 knots, or 36.84 miles per hour. This record was made between Carysfort Reef Lighthouse and Jupiter Inlet Lighthouse.

The Mauretania had steamed fully 1,500,000 miles, including more than 300 voyages across the Atlantic, 120 across the Pacific, 100 across the Indian Ocean, 50 across the South Atlantic, and 200 across the North Atlantic, during the 22 years of her service. Some 100,000 passengers were carried across the Atlantic, 100,000 across the Pacific, 100,000 across the Indian Ocean, 100,000 across the South Atlantic, and 200,000 across the North Atlantic.

The Mauretania was named for a former Roman provine in North Africa.

Grading Of Print Butter**Will Shortly Be In Effect All Through West**

Grading of print butter will soon be an accomplished fact in Western Canada. Hon. D. G. McKenzie, Manitoba Minister of Agriculture, has announced that the grading of creamy print butter sold in that province will go into effect June 1, enabling legislation having been passed recently by the province. Similar regulations are understood to have gone into effect in British Columbia and Alberta on May 1, and in Saskatchewan on June 1.

At the present time, under the Federal Dairy Industry Act, regulations provide for the grading and sale of all butter, whether in boxes or in paper prints, as only first, second, third or no grade, whereas formerly only such butter as was going on export or into storage was so graded. Under additions to the act last year provision was made for compulsory print grading, and the western provinces have been the first to pass enabling legislation.

The Most Precious Thing

"Time is the most precious thing, wasting time must be the greatest prodigality, since lost time is never found again; and what we call time enough always proves little enough. Let us then be up and doing, and going to a purpose; so by diligence shall we do more with less perplexity." — Franklin.

Find Petrified Forest

Discovery of a petrified forest dating from a prehistoric age on the slopes of the Adshar mountains in Tiflis, Russia, has been announced. Professor Vinogradov of the Tiflis forestry institute, who made the discovery, said he found trunks of many different species of trees, some of gigantic proportions.

The American Chemical Society is developing a course in chemistry which will enable housewives to detect adulterated foods.

Aberdeen, Scotland, has just installed its first automatic telephone.

Old Smokes at Home!

"All up and down the whole plantation, gladly they room" — choosing the young, sun-ripened leaves for Ogden's Cigarette Tobacco. Leaves that cannot pass the Ogden's quality test are kept "far, far away" from this mellow, satisfying cigarette tobacco; that's why we can promise that Ogden's will satisfy you — particularly when rolled with "Chantecler" or "Vogue" Cigarette Papers.

PULL HERE

Just have a package in your kitchen. You'll be delighted with its convenience — for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

GERMAN POLICY IS DEFENDED IN HOUSE OF LORDS

London.—Defence of German policy was voiced in the house of lords by the Marquess of Lothian and Viscount Esher in the course of a debate on treaty revision.

Lord Davies moved the government should take steps to implement article 19 of the covenant of the League of Nations by the establishment of a satisfactory procedure for effecting a peaceful change in the relationship of the states and for revision of treaties.

Most people recognized the treaty of Versailles was "somewhat severe," said Lord Lothian. Germany in the last 20 years had endured "terrible things." If there was to be peace, she must be given an appropriate place in the world.

Four questions must be decided, he declared—demilitarization of the Rhine area which could not last indefinitely; the question of Austria; the Polish corridor and the former German colonies. It appeared these issues must sooner or later be settled at a round table conference or modified in some more drastic way, he said.

Germany was not the only power which repudiated treaties, said Lord Esher.

"It is only a culprit who can say that the sins of omission of which France and Britain were guilty were better than the sins of commission perpetrated by Germany, for Britain and France all along repudiated the treaty of Versailles in the sense of not having put into force the pledge to disarm. . . . Germany and Japan are expanding, dynamic nations. We ought surely to understand their viewpoint," he said.

Lord Davies' motion was finally withdrawn after Earl Stanhope, under-secretary of state for foreign affairs, had replied.

Britain had disarmed on land, at sea and in the air to a point which was generally considered surprising the earl said. He expressed surprise it should still be considered Britain had failed to fulfil disarmament clauses. Referring to the question of revision of treaties, Lord Stanhope said:

"You cannot satisfy one nation with regard to frontiers without making another nation give up territory, and until you can get a greater feeling of friendship and confidence between the nations any procedure making for alteration of frontier is obviously one that will lead to more misunderstanding, difficulty and friction than if things were left as they are."

Pictures Of Quintuplets

Royalties May Bring In Large Sum For Dime Fund

Toronto.—A million pictures of the Dionne quintuplets will grace 1936 calendar through an agreement announced by Joseph Sedgwick of the Ontario attorney-general's department.

Arrangements were completed by a large lithographing company in the United States, the copyright holders of photographs of the babies, and Mr. Sedgwick, acting with the board of guardians for the little Dionnes.

Royalties which may amount to \$35,000, will be paid into the quintuplets' fund. The company's Canadian agents will hold rights in Canada.

Prohibit Importation

Two Books Of John Buchan Not Allowed Entry On Account Of Copyright

Ottawa.—The department of national revenue sent notification to customs collectors that portation of two books by John Buchan, Canada's governor-general designate, had been prohibited.

The prohibition order was issued, the notification said, at the request of publishers who have obtained copyrights under the Canadian act and do not wish copies of the works printed in other countries to be imported into Canada.

The books are "Prester John" and "Salute to Adventure."

Taken Off Relief

Toronto.—Controller Sam McBride charged at a board of control meeting that a man living in a \$20,000 house, who is a butler, has been receiving relief. Welfare Commissioner A. W. Laver said the man, who had been living in the country and had given a wrong address, was taken off relief.

Seeding Late In Alberta

Will Be General Soon If Weather Is Favorable

Calgary.—Wind and weather being favorable, seeding is expected to be general through southern Alberta from Red Deer to the border, within a few days, the latest in the past 14 years.

The late start, however, has not worried farmers. Moisture conditions are good, and wheat will have a better than even break against weeds and grasshoppers.

There is expected, according to reports gathered by the Calgary Herald, to be a large increase in acreage sown to coarse grain and feed crops, particularly oats.

Some southern districts seeding is from 10 to 20 per cent. underway. From Red Deer north to the Peace River there is virtually no seeding, but work on the land is underway at a few points, according to The Herald reports.

Britain Not Worrying

Not Stirred Too Deeply By Germany's U-Boat Plan

London.—Great Britain does not intend to become stirred too deeply by Germany's building of U-boats, but will continue plans for the projected Anglo-German naval talks, it was authoritatively asserted here.

During the talks, which will take place probably after Chancellor Adolf Hitler outlines his foreign policy before the Reichstag about May 15, Joachim von Ribbentrop, Hitler's personal arms emissary, will head Germany's special delegation, it was officially confirmed.

The cabinet, it was learned, will study these three methods proposed for dealing with this latest violation of the treaty of Versailles:

1. A protest to Berlin.

2. Intervention at Geneva.

3. Consultation with France and Italy, in pursuance of the agreements reached at the Stresa conference.

Drop Liquor Charges

Lock Of Territorial Jurisdiction Stated As Reason

Montreal.—Charges facing residents of the Maritime provinces of conspiracy to "defraud" the Dominion government of \$5,000,000 through liquor smuggling were dropped because of doubt of territorial jurisdiction and also because of expense, J. P. Penner, K.C., crown prosecutor, declared at preliminary hearing of eight men on similar charges continued. The case is expected to close within a few days.

Those being tried are the four Bronfman brothers, Sam, Allan, Harry and Abe, Barney Aaron, F. S. Blair and James Cramphorn, all of Montreal, and William Yule, Halifax.

Important Role

Prince Of Wales Makes Appeal For Support Of Jubilee Trust Fund

London.—The Prince of Wales will naturally assume an important role in the jubilee celebrations marking the 25-year reign of his father.

That was emphasized with the appearance of the official jubilee program of which the first page was devoted to an appeal from the prince signed in his signature "Edward P." for support of the "King George's Jubilee Trust."

The trust, for which some \$20,000,000 is sought, will be used for young Britain—"To steady youth in its difficult days and strengthen its maturity."

Not Closing Camps

Ontario Not Shutting Down Relief Camps At Sudbury

Toronto.—Ontario government relief camps near Sudbury and Sault Ste. Marie are not being closed. Hon. Peter H. Hogg, provincial minister of lands and forests, stated here.

He pointed out that a number of men, including settlers, who would have an opportunity to cultivate that land, had been let out until the province learns from the federal government what contribution Ottawa is prepared to make toward works on trans-Canada highway project.

Short Of Small Change

Mexico, D.F.—Although \$60,000,000 pesos in new copper coins have been put in circulation by the Bank of Mexico, the shortage of small change for business transactions became more acute as silver money was surrendered to the bank in compliance with a government decree requiring it from circulation.

Germany's Naval Plans

Hitler May Decide To Shroud Intentions In Mystery

Berlin.—Adolf Hitler was believed in competent quarters to be planning to use Germany's naval re-armament to keep him in the "driver's seat" in arms negotiations with other powers.

It was thus these quarters explained the continued official secrecy concerning the extent of the reich's plans for naval construction, and the reiterated official denials that submarines actually have been constructed.

Commentators here said the führer may decide to shroud his naval plans in continued official secrecy and approach the scheduled Anglo-German naval conversations reluctantly.

Commenting on reports from abroad that the reich already had six submarines ready for manoeuvres, one foreign naval expert said: "It is impossible to hide a submarine along Germany's coast—and what good would a hidden submarine be for such things as training?"

Rev. Sidney M. Berry, D.D., moderator of the Free Church Council of England and Wales, who read the lessons at the service in St. Paul's Cathedral, the King's Jubilee.

London.—An account of their conferences and conversations with European statesmen was given to Prime Minister R. B. Bennett and other heads of the self-governing Dominions by Prime Minister Ramsay MacDonald and Sir John Simon, secretary of the foreign office, at an informal gathering in the commons. A discussion followed.

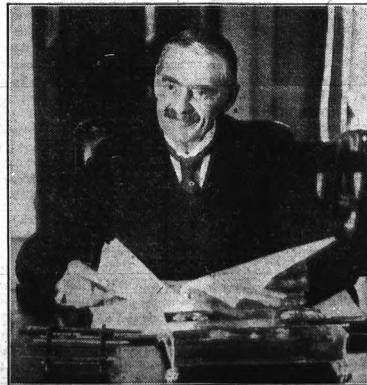

The meeting occupied an hour and a half after which a communiqué was issued. The communiqué said: "The prime minister entertained at the prime ministers of Canada, Australia and South Africa. The prime minister of New Zealand was unable to be present as he had not arrived in England. Several colleagues of the prime ministers were also present."

"An opportunity was taken to have an informal discussion of the present international situation in the course of which Mr. MacDonald and Sir John Simon gave an account of recent conferences and conversations with European states. Among the ministers present besides Mr. MacDonald and Sir John were Stanley Baldwin, lord president of the council; Neville Chamberlain, chancellor of the exchequer; J. H. Thomas, secretary for the Dominions; and Sir Philip Cunliffe-Lister, secretary for the colonies."

It is understood Sir John gave an account of the events of the last two months starting with conversations with the French government beginning in February, covering the German declaration of conscription, the Berlin and other visits, the Stresa conference and the meeting of the League council at Geneva. Mr. MacDonald also participated in the talks and the policy of the United Kingdom throughout these events was sketched.

It was gathered that the talk was entirely confined to international affairs and consisted very largely in the Dominion premiers asking and receiving information.

THE CHANCELLOR PREPARES HIS BUDGET

Here we see Mr. Neville Chamberlain, Britain's Chancellor of the Exchequer, preparing the nation's budget, which was so well received in the British House recently. A comfortable surplus was announced and taxation was cut to a very great extent.

AT KING'S JUBILEE

Kidnapping Charge

Dutch Police Investigating Activities Of Nazi Government

The Hague.—Investigation of the kidnapping of a German laborer named Gutzeit from Dutch territory was pressed by police as public opinion connected the case with the deportation of Major Witte, also a German, for carrying on Nazi propaganda in the Netherlands.

Government authorities emphasized, however, the two events were not connected. They also denied their relation to the reported kidnapping of a man named Euseched who, it is said, was spirited across the border into Germany coincident with the Gutzeit disappearance.

The expulsion of Major Witte was ordered about three weeks ago by Dutch authorities, according to a report submitted to the lower house by J. R. H. Van Schaik, minister of justice. He added the Nazi agent had recrossed the border into Germany on April 22. He had been chief of the Nazi bureau in Amsterdam for over a year.

Jumps From Train

Wisconsin Convict Meets Death In Attempt To Escape

Ridgefield, Ont.—Preferring death to trial on forgery charges, William O. Reeves, 64-year-old convict from Waupun, Wis., leaped from a speeding Michigan and Central Railway train near here.

The body of the prisoner, being brought to Arlington, Mass., from Wisconsin state prison, was found mutilated on the railway tracks a few miles from here.

Reeves evaded his guard, Lieut. A. E. Ryan of Arlington, long enough to smash the small circular window in the train washroom and crawl through. The train was travelling at approximately 60 miles an hour as it passed this point, 15 miles northeast of Chatham.

REDUCTION OF INSURANCE RATES FOR H. B. ROUTE

Ottawa.—Reduction of 25 per cent. on the extra premium paid on vessels to be insured into the Hudson Bay route will be effective during the 1935 season under a report of the Imperial shipping committee on Hudson Bay marine insurance rates. The report was made public simultaneously in London and Ottawa.

The decrease in rates for "payment of the warranty," (or for suspension of the guarantee the insured vessel will not engage in certain defined trades which the underwriters regard as involving extra risk), will be applied to insured vessels, with or without a gyro compass.

The advantage of a lower rate given to a ship equipped with a gyro compass, considered by the committee to reduce greatly the risk, is to be maintained. The schedule of rates are involved depending on tonnage, values and other factors.

No change is proposed in the date of the opening of the season, the report states.

The opinion of masters is that the lights in Hudson Strait are judiciously placed the committee finds.

After reviewing operations of the 1934 season, the committee commended highly the aids to navigation supplied by the government, the service rendered by the Canadian government steamer "N.B. McLean" and gives the following as a summary of salient facts for last year:

(A) That 15 commercial voyages have been made practically without casualty in a very difficult season;

(B) That the aids to navigation supplied by the Canadian government have now reached a degree of efficiency they must be accepted as having very materially contributed to this result;

(C) That several of the masters who captained the ships have now made the voyage for more than one season and their experience and confidence may also be regarded as having contributed to the result. The report states the underwriters recognized that the aids to navigation, including especially the services of the two patrol vessels "N.B. McLean" and "Ocean Eagle" had rendered possible an immunity from serious casualty which was gratifying. "Had the bad season under review occurred in the first year after the opening of the Hudson Bay route, the present outlook for the route might have been very different."

ARMS TESTIMONY DISCLOSURES ARE REGRETTED BY U.S.

Washington.—Assuming "full responsibility for this unfortunate incident," Chairman John McSwain told President Roosevelt of his great "regret" at the house military committee's disclosure of secret army testimony which stirred international concern.

Replying to the president's own stern rebuke and disavowal of alleged war plans touching friendly nations—Canada among them—the white-haired South Carolinian wrote the White House:

"I greatly regret the unfortunate inclusion of the executive testimony along with other testimony when it was sent to the public printer. I can assure you that no such incident will again occur because so long as I shall preside as chairman, any testimony that may be given in executive session and that may affect our foreign or diplomatic relations will not be taken down stenographically."

Brigadier-General F. M. Andrews, chief of the general headquarters air force, gave testimony on the need of seizing nearby British and French islands in event of an emergency. Brigadier-General Charles E. Kilbourne testified regarding a "camouflaged" air base near the unfortified Canadian border.

With reference to the flurry over the proposal for an air base in the Great Lakes region, McSwain wrote: "I have not recently read our treaty with the British government concerning the disarmament of our Canadian border line, but my present recollection is that shortly after the War of 1812 and much naval activity upon the Great Lakes, including the victory of Commodore Perry, this treaty expressly stipulated only against battleships or armed vessels upon the Great Lakes."

"It was true then and has ever since been true that we had and continue to have several fields, forts, and posts near or relatively near to our Canadian frontier, and these have never been in any way regarded as unfriendly gestures. By analogy, they might be compared with French fortifications along the Belgian border. They are maintained not against Belgium, but against what might come over and through Belgium, as has happened in the past."

Technical Agriculturists

Dean Shaw Of Saskatchewan University Elected President

Ottawa.—Dean A. M. Shaw, of the faculty of agriculture, University of Saskatchewan, has been elected president of the Canadian Society of Technical Agriculturists.

With the election, conducted by a mail ballot, other officers announced by the society here were:

Vice-president, Dr. W. H. Brittain, of the faculty of agriculture of McGill University; Macdonald College, and M. F. N. Savoie, chief of the administration branch, department of agriculture, Quebec; and honorary secretary, H. G. Crawford, Dominion entomological branch, Ottawa. The officials will take office at the close of the annual convention of the society already announced for Edmonton June 24 to 27.

Announcement also was made that Sir Francis Froude, high commissioner for the United Kingdom, will be the guest speaker at the convention. His subject will be "The Agricultural Situation in Great Britain."

For Polar Flight

Wilkins Looks For Pilots For Venturesome Trip

Toronto.—Sir Hubert Wilkins, explorer of the polar regions, was here interviewing air pilots with a view of finding a pair to accompany him and Lincoln Ellsworth on what may be the first non-stop 2,900-miles flight across Antarctica.

Only two pilots will travel with the expedition, which is slated to leave the United States early in October. Sir Hubert interviewed four flyers here, and will proceed to Winnipeg and talk to some more next week.

To Release Many Prisoners

Montreal.—Between 800 and 400 men and women prisoners in jails in the province of Quebec will be released as a result of the general reduction of sentences granted in celebration of the silver jubilee of King George, it is estimated by officials of the Prisoners' Aid and Welfare Association here.

P. O. Box 32

The production of processed cheese in Canada in 1934 amounted to 11,996,348 pounds.

William Laut, of Crossfield, is Liberal nominee for the Cochrane constituency.

Mrs. Joseph Little and son, Ferris Swan, left the early part of the week for California.

Hon. Robert Weir has recently added to his farming interests in the district between Pincher Creek and Waterton.

Milch cows in Canada increased in numbers from 3,659,269 head on December 1st, 1933, to 3,847,400 on December 1st, 1934, or 5.1 per cent.

R. J. Follis, inspector of hotels and clubs under the liquor control board, has retired on reaching the age limit, and is succeeded by Mr. Martin, from the Wetaskiwin district.

R. M. Easterbrook and family, of Bassano, will move to Grande Prairie to reside.

A flock of about fifty wild swans have been feeding on a large slough about three miles north of Innisfail. Miss Lillian Willow has been appointed special town and school nurse—we don't know what for!

Undoubtedly a man has less courage than a woman. Just imagine one with fifty cents in his pocket trying to fit into seven suits of clothes.

Employees on Tim Buck's boulevard, near Victoria Street, observed the King's Jubilee as a holiday. They worked on May Day.

Messrs. W. J. Fisher, D. Lewis, Joe Fitzpatrick, and others from this district, attended the banquet for members of the 54th Battalion at Ferme on Saturday night last.

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, etc., etc. Please leave in a box or hand them in at The Enterprise office no later than Wednesday evenings.

When a man is down, his enemies stop kicking him and his friends begin.

About ten carloads from this district attended the musical festival at Grandbrook last week end.

The infant child of Mr. and Mrs. Dave Link, Mountain Mill, is said to be a 100 per cent Social Creditor.

Agnes McPhail says: "Women's intuition is needed in government to help men accomplish the things they are unable to do."

W. J. McCann, formerly of Fernie, is manager of Safeway's Store at Fernie, and was a recent visitor to Fernie.

The town dogs seem to be manifesting a keen interest in the Tim Buck boulevard. Almost any minute you can see a dog rendering assistance.

Mrs. Richard Upton, of Bellevue, who has given a great deal of study to choir and church music, will conduct a study on "The Music and Hymns of the United Church" May 1st.

Tom Uphill, M.L.A. for East Kootenay, was one of six persons in that district to be decorated with the King's Silver Jubilee medal. Dr. and Mrs. Elliott, of Corbin, were also decorated.

Adam Bell, deputy minister of labour in B.C., who was at Corbin on behalf of the government, seems to be working along the right lines. On Tuesday he referred a baseball game between the strikers and the police force.—Fernie Free Press.

Corporal Moriarty's devotion to his God and unselfish attention to duty will linger long in the memories of those of his religious faith, to the police detachment of which he was a member, and to the general public. Requiescat in pace.—Drumheller Mail.

There's always something to put a little humor in things. On May 1st, a truck, loaded with coal, entered the ranks of the big labor procession, preceded and followed by men, women and children. Must have intended making it hot for them!

Forty thousand pilgrims from the world over welcomed Eugenio Carillo Pacelli when the papal delegate arrived at the famous Grotto shrine at Lourdes, France, on April 25th, to participate in the three days' prayers for peace. The pilgrimage for peace brought delegations from Canada and other principal countries of the world to the Grotto, where Saint Bernadette Soubirous, a young shepherdess, in 1850 reported the apparitions of the virgin.

J. J. McIntyre, of the Mohawk Mines, Bellevue, has been appointed to succeed J. A. McLeod as superintendent at the International mine at Coleman, while Harry Clark, of Coleman, has been appointed to the mine management at the Mohawk. L. Lindoe has been appointed assistant general manager at the International, and has taken up residence in the house vacated by Mr. Whiteside. Mr. and Mrs. McIntyre will take up residence in Coleman shortly.

Two prominent B.C. parliamentarians recently visited a high class restaurant in the city of Seattle. A charming young lady approached them with copies of the noonday menu. Looking the sheet over, one noticed turkey, and asked as to how it was served. She pointed to the menu, where it read: "Turkey, roast, broiled and N.R.A." They enquired the meaning of the N.R.A., and were told: "N is the neck, R the ribs, and Misters, if I told you what the A represented you'd leave the place and I'd lose my job."

Twenty years ago May the 7th, a torpedo sent the Lututania to bottom.

A sign of prosperity: An addition was built to a house on Hill Sixty last week.

Harvey Murphy was refused admission to British Columbia last week via the Crows' Nest route.

Jackie Coogan was the only survivor from the wreck of a car in which he was a passenger at San Diego, California.

The annual convention of the Canadian Weekly Press Association will be held in Toronto during the last week in July.

Bessie, young daughter of Mr. and Mrs. J. VanMaaren, formerly of Coleman and Blairmore, passed away at Lethbridge last week.

Small Boy (Blairmore girl who dropped her vanity case on the walk): "Hi, Miss, wait a minute—you have dropped your repair kit."

The next regular meeting of Crows' Nest Chapter, I.O.D.E., will be held at the home of Mrs. J. R. Warner on Monday, May 13th, at 7:30 p.m. General.

Blairmore is the only town under the British flag where teachers are being urged to become "red." And there isn't another town or city in the British Empire that would want a "red" teacher.

Last week the Okotoks Review carried an article, headed: "Mary's Anklet to be shown here." We wondered why so many men and boys from this district headed for Okotoks during the week end.

Although prospects are big that trees and shrubbery along the south side of Victoria Street will completely hide the noonday sun from store windows across the street, business people have not yet decided to dispose of their awnings.

Town Constable: "And I walks in and catches him there takin' the money out of the safe. I shows him my badge, and he looks at my papers, so I sez: 'You're under arrest,' but he wouldn't believe I was an officer and, by jingo, I had to let him go."

A whole lot has been talked about the formation in the Crows' Nest Pass of an Old Timers' Association. Well, let's get busy and form one. It is suggested that those resident in the district for twenty or twenty-five years should be eligible.

J. P. Alexander, superintendent of the Rocky Mountain Forest Reserve, formerly of Pincher Creek, has been promoted to the superintendence of the Crows' Nest Forest Reserve, with headquarters in Calgary, his duties to commence May the 16th.

Years ago, when Blairmore was at its best, the town could not see the wisdom of wasting ratepayers' money on such nonsense as monuments, parks, swimming pools, etc. Today the town apparently has money galore to throw away, but cannot see a cent for relief without assistance from federal or provincial governments. Where's the wisdom? Of course, the governments are keeping up on it.

There is at least one poor fish who didn't know when he had enough. An enthusiastic angler out fishing on a lake in Nova Scotia just recently hooked a trout but his line broke, leaving the hook in the trout's mouth with three feet of line attached. The next day the angler cast at the opposite end of the lake and the same trout grabbed the bait, according to information reaching the Fish and Game Department of the Canadian National Railways. When landed the broken line was still in the mouth of the fish.

ALBERTA

At Coleman their white mayors had

the honor of presenting King's jubilee medals.

On Easter, each inmate of a certain state prison received four hard-boiled eggs.

Amelia Earhart made a successful non-stop flight from Mexico, D.F., to New York, a distance of 2100 miles.

Miss Beatrice Trono, of Blairmore, was awarded 1st prize in senior piano at the Calgary musical festival.

How times do change. In the old days the sweetheart, discarded for a new charmer, died of a broken heart instead of a cracked head.

Editor and Mrs. F. T. Edwards, of the Pincher Creek Echo, paid fraternal visits to The Enterprise and the Coleman Journal on Friday last.

A guy who appeared in a Cranbrook court last week, charged with disturbing the peace of the community by abusing a saxophone, was released with a warning.

A boy and girl playing among the rubbish thrown out on an east Windmill hotel recovered \$4 in bills and \$15 in silver that had been thrown out by the janitor.

Isn't science wonderful? Now that odorous cabbage has been achieved, dissatisfied scientists will probably begin monkeying with the smell of onions and limberger cheese.
